

## **Instructions for Stop the Bites®-EX!**

**FOR OUTDOOR USE ONLY:** Including, but not limited to building foundations, windows, doors, cracks, crevices, off residential structures, commercial, industrial buildings/structures, including restaurants, warehouses, food processing plants, supermarkets, hospitals, nursing homes, motel, motels, hotels, schools, daycares, laboratories, computer facilities, aircraft, buses, trailers, trucks, tires, boats/ship, boat docks, trains, pet shop, zoos where no animals are present, and other similar areas. Use as often as necessary to kill targeted pests. Also, for use on lawns and shrubs surrounding residential or commercial buildings.

**FOR USE ON OUTDOOR PERIMETER AND RECREATIONAL AREAS:** To kill aphids, ants (including Argentine, fire ants and other ant species), cockroaches (all species), crickets, centipedes, fleas, house spiders, black widow spiders, deer, dog and lone star ticks, paper wasp, Japanese beetles, fall armyworms, billbugs/weevils, silverfish.

Apply with a compressed air sprayers hand held, hose end or backpack, dilute 4 to 8 fluid ounces of Stop the Bites®-EX! in a gallon of water (use lower rates for maintenance services and higher rates for active infestations) apply at a rate of 170 fl. Ounces (1.3 gallons) per 1,000 sq. ft., or until the area is thoroughly wet. Apply to the soil and vegetation in a barrier 6 to 10 feet adjacent to buildings. Treat the building's foundation to a height of 2 to 3 feet with sufficient water for coverage. Make special efforts to spray where targeted pest congregates such as, but not limited to waste receptacles, dumpsters, and exteriors of structures. Repeat as reinfestation warrants. For extreme infestations apply at up to 12 fluid ounces of Stop the Bites®-EX! per gallon of water.

**FOR USE ON LAWNS:** To kill ants, armyworms, billbugs, chiggers, chinch bugs, crickets, cutworms, fleas, grasshoppers, weevils, Japanese beetle adults, mole crickets, fall army worms, and ticks. In compressed air, power, or backpack sprayer, dilute 4-8 ounces of Stop the Bites®-EX! Per gallon of water and apply at the rate of 340-680 fl. ounces (2.5 - 5.0 gallons) per 1,000 square feet, until area is thoroughly wet but not to the point of runoff. For extreme infestations, dilute up to 16 fluid ounces of Stop the Bites®-EX! Per gallon of water and apply at the rate of .7-gallon solution to 1000 square feet. Repeat as reinfestation warrants.

**FOR USE ON FOOD AND NON-FOOD BEARING TREES AND SHRUBS:** To kill ants, aphids, bagworms, beetles, psyllids, worms, whiteflies on plants such as, but not limited to (crab apple, apples, peaches, chrysanthemum, azaleas, boxwood and other exterior plants or trees). Dilute 4 to 8 ounces of Stop the Bites®-EX! Per gallon of water and apply using a compressed air, power or backpack sprayer at the rate of 86 fl. ounces (0.67 gallon) of solution per 1,000 square feet until foliage is wet but not to the point of runoff. May be applied up to the day of harvest on food bearing plants. Vegetation around stagnate pools, marshy areas, pools/ponds and shorelines may be treated. Do not spray directly on stagnant or flowing water. Reapply as infestation warrants. Ensure that you do not have over sprays on bedding flowers, especially roses.
